EDUCATION

BCA-Bachelor of computer science
Institute of Computer Science & Technology

2017 - 2019

70%

WORK EXPERIENCE

React native Developer - Intern
Osizone

03/2019 - 05/2019

Achievements/Tasks

- Working with React hooks
- Designing a custom components
- API integration
- Storybook components creation
- Jest/React native testing library

React native Developer
Osizone

2019 - Present

Achievements/Tasks

- Working with Great Team: as a fresher, I learned how to collaborate and work under a team leader, and I think it was the first nice thing.
- Developing a production-ready software: I was using a typescript where maximum bugs got solved during development and secondly due to writing a modular code it was easy for me to understand the whole code while I am moving to different files
- Creating REST APIs and integrating different Databases:
- Developing a Cross-Platform Mobile App: freedom to create all components in web style is something which I really like in react native and of course, the same app will run in android and IOS.
- Creating components with story book: creating react components and testing within pages is seems to be lengthy for me but after working with story book creating, testing components is much easier.
- Testing with jest: Testing every single part with itself is time taken task instead just push a single test command which will give me a complete test report on all different test case

SKILLS

HTML/CSS

JavaScript/Typescript

NodeJS

React/React-native

Redux

Jest/React native testing library

Storybook

Bootstrap

Tailwind

Git

Express

Rest Api/GraphQL

MongoDB

PERSONAL PROJECTS

Educare LMS

- A serverless learning management system.

Talktor

- A doctor appointment app

Stument

- A student requirement app

Arogyam

- Online medicine and lab test report

CERTIFICATES

Mern Stack - LearnCodeOnline.com

React Certificate - Hackerrank.com

JavaScript Basic - Hackerrank.com

Code Guru - Galgotia college

Android App Development - Apttron
